

Dear All,

Please be informed that, with effect from 22nd July 2017 all types of vehicles entering PTP through the Main Gate regardless of green, orange or yellow stickers and areas are required to be equipped with beacon lights. All companies that are operating in PTP are given a duration of one month period to ensure that all their vehicles are equipped with the beacon lights. Please refer to the attachment for details. We will be sharing this directive across many channels that we have to ensure it received maximum coverage.

Please be reminded that after 22nd of July 2017, vehicles that are not equipped with beacon lights are not allowed to enter PTP; as ample time has been given for them to make the necessary preparation. We hope you will support us in making PTP a safe place to work as in doing so will also benefit your company.

Thank You

Health, Safety and Environment Department.
